AI-Assisted Retinal OCT Analysis Report

Report ID:	VCA-12345
Generated:	2026-06-10 22:35:22
Scan Date:	2026-06-10

PATIENT INFORMATION

Patient Name:	John Doe
Patient ID:	PID-UNKNOWN
Doctor:	Dr. VisionCare AI

1. CHIEF COMPLAINT

AI-assisted evaluation of retinal OCT scan for detection of Diabetic Macular Edema

2. PATIENT SYMPTOMS & HISTORY

- Visual symptoms to be reported by patient at examination
- Medical history to be reviewed with attending physician
- Current medications: As per medical records

3. OCT FINDINGS & DIAGNOSIS

Primary Diagnosis: Diabetic Macular Edema
Diagnostic Code: DME
AI Confidence Level: 87.5%
Disease Stage: Moderate

4. RETINAL LAYER ANALYSIS

Retinal Affected Area: 35%
Lesion Area: 12%
Fluid Accumulation: 23%
Abnormality Index: 42%

5. THICKNESS MAP & LAYER ANALYSIS

Automated segmentation analysis performed using deep learning:

- Inner Limiting Membrane (ILM): Analyzed
- Retinal Nerve Fiber Layer (RNFL): Analyzed
- Ganglion Cell Layer (GCL): Analyzed
- Inner Plexiform Layer (IPL): Analyzed
- Inner Nuclear Layer (INL): Analyzed
- Outer Plexiform Layer (OPL): Analyzed

• External Limiting Membrane (ELM): Analyzed
• Ellipsoid Zone (EZ): Analyzed
• Retinal Pigment Epithelium (RPE): Analyzed

6. IMPRESSION & DIAGNOSIS

Diabetic Macular Edema with severity grade: **Moderate**
The AI analysis indicates diabetic macular edema affecting approximately 35% of the retinal region.

7. SEVERITY GRADE & CLASSIFICATION

Severity Stage: Moderate

8. RISK ASSESSMENT

Overall Risk Score: 71/100
Risk Level: **High**
Recommendation Priority: Follow physician guidelines based on risk assessment

9. LIFESTYLE RECOMMENDATIONS

• Maintain tight glucose control (target HbA1c < 7%)
• Monitor blood pressure regularly (target < 130/80 mmHg)
• Take prescribed diabetic medications regularly
• Reduce salt and sugar intake
• Exercise regularly (150 minutes per week)

10. FOLLOW-UP PLAN & MONITORING

• Next appointment: 3 months
• Required imaging: Monthly OCT and visual field testing
• Consult retinal specialist if vision changes occur
• Seek immediate care for sudden vision loss

11. CLINICAL DECISION SUPPORT (CDSS)

Clinical correlation required. Please consult an ophthalmologist for detailed treatment planning.
