AI-Assisted Retinal OCT Analysis Report

Report ID:	VCA-13
Generated:	2026-06-10 22:36:18
Scan Date:	2026-05-27 06:44:03

PATIENT INFORMATION

Patient Name:	Test
Patient ID:	PID-8
Doctor:	Dr. VisionCare AI

1. CHIEF COMPLAINT

AI-assisted evaluation of retinal OCT scan for detection of Age-Related Macular Degeneration

2. PATIENT SYMPTOMS & HISTORY

- Visual symptoms to be reported by patient at examination
- Medical history to be reviewed with attending physician
- Current medications: As per medical records

3. OCT FINDINGS & DIAGNOSIS

Primary Diagnosis: Age-Related Macular Degeneration
Diagnostic Code: AMD
AI Confidence Level: 70.6%
Disease Stage: Severe

4. RETINAL LAYER ANALYSIS

Retinal Affected Area: 40.9%
Lesion Area: 29.9%
Fluid Accumulation: 21.5%
Abnormality Index: 97.6%

5. THICKNESS MAP & LAYER ANALYSIS

Automated segmentation analysis performed using deep learning:
- Inner Limiting Membrane (ILM): Analyzed
- Retinal Nerve Fiber Layer (RNFL): Analyzed
- Ganglion Cell Layer (GCL): Analyzed
- Inner Plexiform Layer (IPL): Analyzed
- Inner Nuclear Layer (INL): Analyzed
- Outer Plexiform Layer (OPL): Analyzed

• External Limiting Membrane (ELM): Analyzed
• Ellipsoid Zone (EZ): Analyzed
• Retinal Pigment Epithelium (RPE): Analyzed

6. IMPRESSION & DIAGNOSIS

Age-Related Macular Degeneration with severity grade: **Severe**
The AI analysis indicates age-related macular degeneration affecting approximately 40.9% of the retinal region.

7. SEVERITY GRADE & CLASSIFICATION

Severity Stage: Severe

8. RISK ASSESSMENT

Overall Risk Score: 100/100
Risk Level: **Critical**
Recommendation Priority: Follow physician guidelines based on risk assessment

9. LIFESTYLE RECOMMENDATIONS

• Take daily antioxidant and mineral supplements (AREDS formula)
• Maintain healthy weight and exercise regularly
• Eat colorful fruits and vegetables
• Avoid smoking and protect from UV exposure
• Monitor vision using Amsler grid daily

10. FOLLOW-UP PLAN & MONITORING

• Next appointment: 1 month
• Required imaging: Bi-weekly OCT and specialist evaluation
• Consult retinal specialist if vision changes occur
• Seek immediate care for sudden vision loss

11. CLINICAL DECISION SUPPORT (CDSS)

Clinical correlation required. Please consult an ophthalmologist for detailed treatment planning.

QR CODE & REPORT VERIFICATION

Report ID: VCA-13
