VisionCare Medical Center

AI-Assisted Retinal OCT Analysis Report

Report ID:	VCA-55
Generated:	2026-10-11 16:51:11
Scan Date:	2026-10-11 11:21:08

PATIENT INFORMATION

Patient Name:	Test Patient
Patient ID:	PID-43
Doctor:	Dr. VisionCare AI

1. CHIEF COMPLAINT

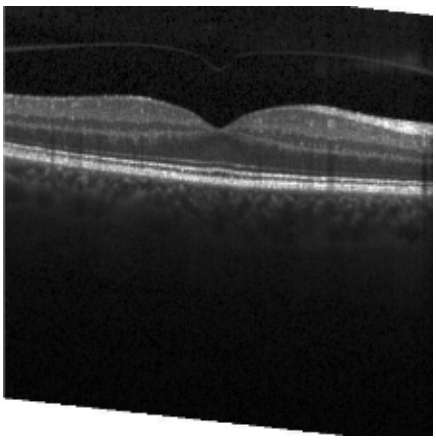

AI-assisted evaluation of retinal OCT scan for detection of Normal Retina

2. PATIENT SYMPTOMS & HISTORY

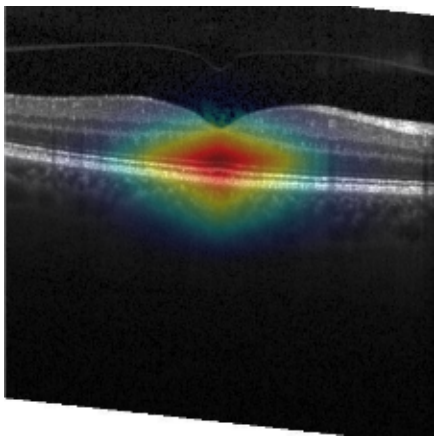

- Visual symptoms to be reported by patient at examination
- Medical history to be reviewed with attending physician
- Current medications: As per medical records

SCAN IMAGES & ANALYSIS VISUALIZATIONS

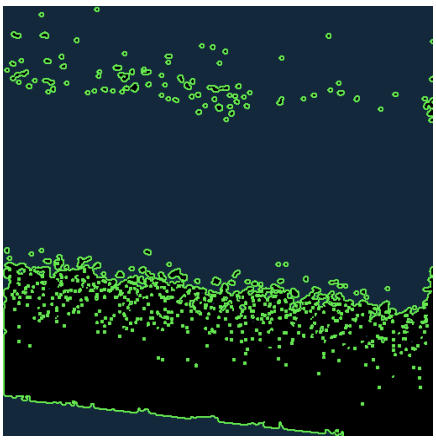

Original Scan

Heatmap Analysis

Segmentation Mask

3. OCT FINDINGS & DIAGNOSIS

Primary Diagnosis: Normal Retina
Diagnostic Code: NORMAL
AI Confidence Level: 79.8%
Disease Stage: Normal

4. RETINAL LAYER ANALYSIS

Retinal Affected Area: 0%
Lesion Area: 0%
Fluid Accumulation: 0%
Abnormality Index: 0%

5. THICKNESS MAP & LAYER ANALYSIS

Automated segmentation analysis performed using deep learning:
• Inner Limiting Membrane (ILM): Analyzed
• Retinal Nerve Fiber Layer (RNFL): Analyzed
• Ganglion Cell Layer (GCL): Analyzed
• Inner Plexiform Layer (IPL): Analyzed
• Inner Nuclear Layer (INL): Analyzed
• Outer Plexiform Layer (OPL): Analyzed
• External Limiting Membrane (ELM): Analyzed
• Ellipsoid Zone (EZ): Analyzed
• Retinal Pigment Epithelium (RPE): Analyzed

6. IMPRESSION & DIAGNOSIS

Normal Retina with severity grade: **Normal**
The AI analysis indicates normal retina affecting approximately 0% of the retinal region.

7. SEVERITY GRADE & CLASSIFICATION

Severity Stage: Normal

8. RISK ASSESSMENT

Overall Risk Score: 0/100
Risk Level: **Low**
Recommendation Priority: Follow physician guidelines based on risk assessment

9. LIFESTYLE RECOMMENDATIONS

• Maintain regular eye check-ups (annually or as recommended)
• Protect eyes from UV radiation with quality sunglasses
• Maintain a balanced diet rich in antioxidants
• Avoid smoking and excessive alcohol consumption

10. FOLLOW-UP PLAN & MONITORING

• Next appointment: 12 months
• Required imaging: Regular retinal examination
• Consult retinal specialist if vision changes occur
• Seek immediate care for sudden vision loss

QR CODE & REPORT VERIFICATION

Report ID: VCA-55
Verification Code: 20261011 165111

MEDICAL DISCLAIMER

This report is generated through AI-assisted analysis of OCT imaging and is intended for informational purposes only. It should NOT be used as a substitute for professional medical diagnosis and treatment.
