## AI-Assisted Retinal OCT Analysis Report

| | |
|---|---|
| Report ID: | VCA-58 |
| Generated: | 2026-10-11 16:51:15 |
| Scan Date: | 2026-10-11 11:21:15 |

## PATIENT INFORMATION

| | |
|---|---|
| Patient Name: | Test Patient |
| Patient ID: | PID-46 |
| Doctor: | Dr. VisionCare AI |

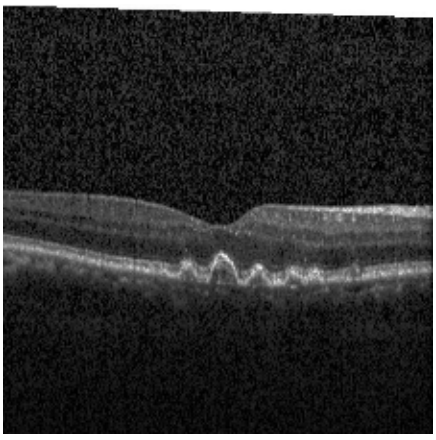

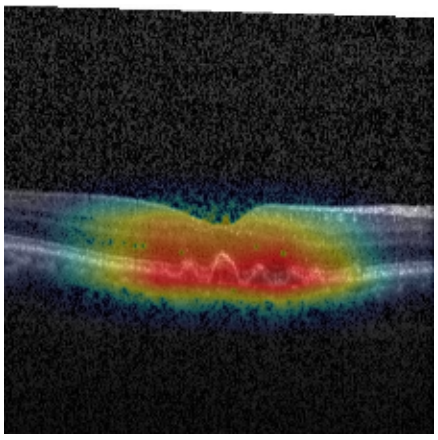

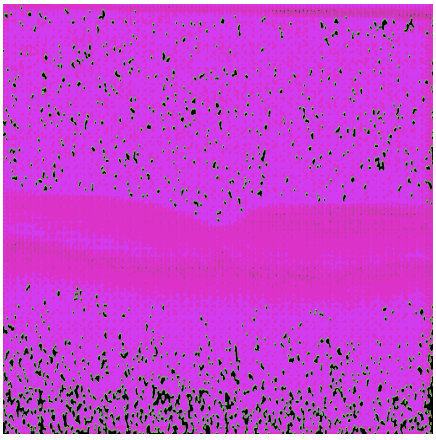

## 1. CHIEF COMPLAINT

AI-assisted evaluation of retinal OCT scan for detection of Drusen

## 2. PATIENT SYMPTOMS & HISTORY

- Visual symptoms to be reported by patient at examination
- Medical history to be reviewed with attending physician
- Current medications: As per medical records

## SCAN IMAGES & ANALYSIS VISUALIZATIONS

| Original Scan | Heatmap Analysis | Segmentation Mask |
|---|---|---|
|  |  |  |

## 3. OCT FINDINGS & DIAGNOSIS

**Primary Diagnosis:** Drusen
**Diagnostic Code:** DRUSEN
**AI Confidence Level:** 71.1%
**Disease Stage:** Severe

## 4. RETINAL LAYER ANALYSIS

**Retinal Affected Area:** 59.0%
**Lesion Area:** 57.1%
**Fluid Accumulation:** 38.29%
**Abnormality Index:** 94.87%

## 5. THICKNESS MAP & LAYER ANALYSIS

Automated segmentation analysis performed using deep learning:
• Inner Limiting Membrane (ILM): Analyzed
• Retinal Nerve Fiber Layer (RNFL): Analyzed
• Ganglion Cell Layer (GCL): Analyzed
• Inner Plexiform Layer (IPL): Analyzed
• Inner Nuclear Layer (INL): Analyzed
• Outer Plexiform Layer (OPL): Analyzed
• External Limiting Membrane (ELM): Analyzed
• Ellipsoid Zone (EZ): Analyzed
• Retinal Pigment Epithelium (RPE): Analyzed

## 6. IMPRESSION & DIAGNOSIS

Drusen with severity grade: **Severe**
The AI analysis indicates drusen affecting approximately 59.0% of the retinal region.

## 7. SEVERITY GRADE & CLASSIFICATION

**Severity Stage:** Severe

## 8. RISK ASSESSMENT

**Overall Risk Score:** 100/100
**Risk Level:** **Critical**
**Recommendation Priority:** Follow physician guidelines based on risk assessment

## 9. LIFESTYLE RECOMMENDATIONS

• Monitor vision daily using Amsler grid
• Take AREDS supplements as recommended
• Maintain healthy lifestyle and diet
• Avoid smoking and UV exposure
• Regular comprehensive eye exams

## 10. FOLLOW-UP PLAN & MONITORING

• Next appointment: 1 month
• Required imaging: Bi-weekly OCT and specialist evaluation
• Consult retinal specialist if vision changes occur
• Seek immediate care for sudden vision loss

## QR CODE & REPORT VERIFICATION

**Report ID:** VCA-58
**Verification Code:** 20261011 165115

## MEDICAL DISCLAIMER

This report is generated through AI-assisted analysis of OCT imaging and is intended for informational purposes only. It should NOT be used as a substitute for professional medical diagnosis and treatment.
