VisionCare Medical Center

AI-Assisted Retinal OCT Analysis Report

Report ID:	VCA-66
Generated:	2026-10-11 17:28:50
Scan Date:	2026-10-11

PATIENT INFORMATION

Patient Name:	Patient_CNV
Patient ID:	PID-50
Doctor:	Dr. VisionCare AI

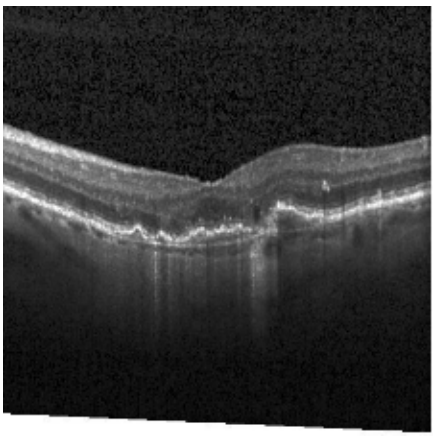

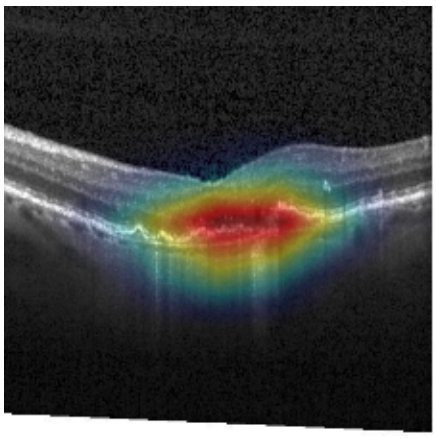

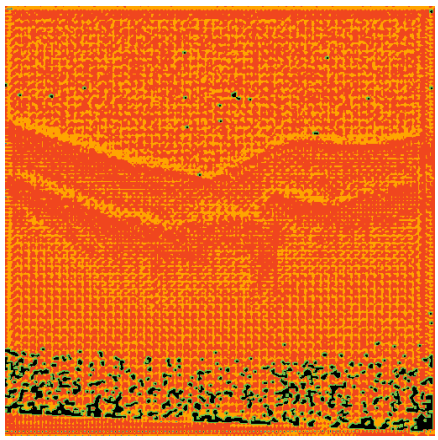

1. CHIEF COMPLAINT

AI-assisted evaluation of retinal OCT scan for detection of Choroidal Neovascularization

2. PATIENT SYMPTOMS & HISTORY

- Visual symptoms to be reported by patient at examination
- Medical history to be reviewed with attending physician
- Current medications: As per medical records

SCAN IMAGES & ANALYSIS VISUALIZATIONS

Original Scan	Heatmap Analysis	Segmentation Mask
		

3. OCT FINDINGS & DIAGNOSIS

Primary Diagnosis: Choroidal Neovascularization
Diagnostic Code: CNV
AI Confidence Level: 67.9%
Disease Stage: Severe

4. RETINAL LAYER ANALYSIS

Retinal Affected Area: 61.8%
Lesion Area: 61.33%
Fluid Accumulation: 38.15%
Abnormality Index: 98.4%

5. THICKNESS MAP & LAYER ANALYSIS

Automated segmentation analysis performed using deep learning:
• Inner Limiting Membrane (ILM): Analyzed
• Retinal Nerve Fiber Layer (RNFL): Analyzed
• Ganglion Cell Layer (GCL): Analyzed
• Inner Plexiform Layer (IPL): Analyzed
• Inner Nuclear Layer (INL): Analyzed
• Outer Plexiform Layer (OPL): Analyzed
• External Limiting Membrane (ELM): Analyzed
• Ellipsoid Zone (EZ): Analyzed
• Retinal Pigment Epithelium (RPE): Analyzed

6. IMPRESSION & DIAGNOSIS

Choroidal Neovascularization with severity grade: **Severe**
The AI analysis indicates choroidal neovascularization affecting approximately 61.8% of the retinal region.

7. SEVERITY GRADE & CLASSIFICATION

Severity Stage: Severe

8. RISK ASSESSMENT

Overall Risk Score: 100/100
Risk Level: **Critical**
Recommendation Priority: Follow physician guidelines based on risk assessment

9. LIFESTYLE RECOMMENDATIONS

• Avoid smoking completely
• Take antioxidant supplements as recommended by physician
• Maintain healthy blood pressure
• Eat dark leafy greens and omega-3 rich foods
• Protect eyes from bright sunlight

10. FOLLOW-UP PLAN & MONITORING

• Next appointment: 1 month
• Required imaging: Bi-weekly OCT and specialist evaluation
• Consult retinal specialist if vision changes occur
• Seek immediate care for sudden vision loss

QR CODE & REPORT VERIFICATION

Report ID: VCA-66
Verification Code: 20261011 172850

MEDICAL DISCLAIMER

This report is generated through AI-assisted analysis of OCT imaging and is intended for informational purposes only. It should NOT be used as a substitute for professional medical diagnosis and treatment.
