VisionCare Medical Center

AI-Assisted Retinal OCT Analysis Report

Report ID:	VCA-95
Generated:	2026-10-12 15:59:52
Scan Date:	2026-10-12

PATIENT INFORMATION

Patient Name:	Ramesh Kumar
Patient ID:	PID-62
Doctor:	Dr. VisionCare AI

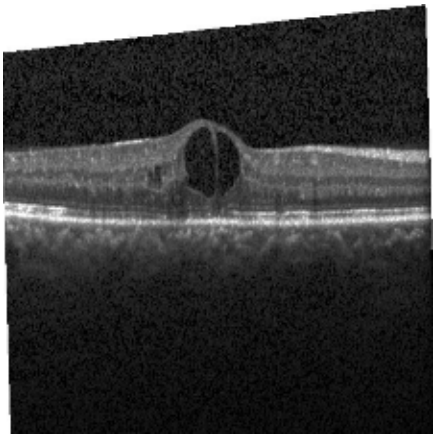

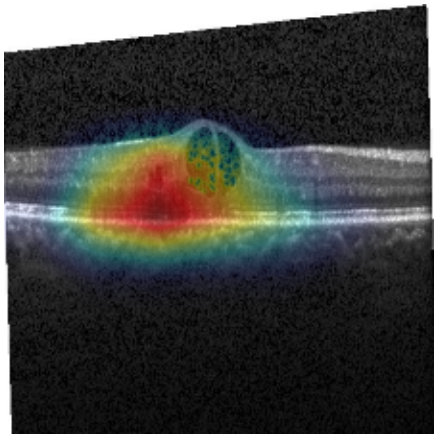

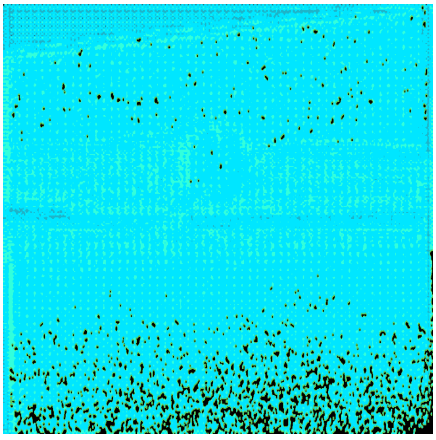

1. CHIEF COMPLAINT

AI-assisted evaluation of retinal OCT scan for detection of Diabetic Macular Edema

2. PATIENT SYMPTOMS & HISTORY

- Visual symptoms to be reported by patient at examination
- Medical history to be reviewed with attending physician
- Current medications: As per medical records

SCAN IMAGES & ANALYSIS VISUALIZATIONS

Original Scan	Heatmap Analysis	Segmentation Mask
		

3. OCT FINDINGS & DIAGNOSIS

Primary Diagnosis: Diabetic Macular Edema
Diagnostic Code: DME
AI Confidence Level: 91.5%
Disease Stage: Severe

4. RETINAL LAYER ANALYSIS

Retinal Affected Area: 52.9%
Lesion Area: 21.2%
Fluid Accumulation: 75.31%
Abnormality Index: 98.63%

5. THICKNESS MAP & LAYER ANALYSIS

Automated segmentation analysis performed using deep learning:
• Inner Limiting Membrane (ILM): Analyzed
• Retinal Nerve Fiber Layer (RNFL): Analyzed
• Ganglion Cell Layer (GCL): Analyzed
• Inner Plexiform Layer (IPL): Analyzed
• Inner Nuclear Layer (INL): Analyzed
• Outer Plexiform Layer (OPL): Analyzed
• External Limiting Membrane (ELM): Analyzed
• Ellipsoid Zone (EZ): Analyzed
• Retinal Pigment Epithelium (RPE): Analyzed

6. IMPRESSION & DIAGNOSIS

Diabetic Macular Edema with severity grade: **Severe**
The AI analysis indicates diabetic macular edema affecting approximately 52.9% of the retinal region.

7. SEVERITY GRADE & CLASSIFICATION

Severity Stage: Severe

8. RISK ASSESSMENT

Overall Risk Score: 100/100
Risk Level: **Critical**
Recommendation Priority: Follow physician guidelines based on risk assessment

9. LIFESTYLE RECOMMENDATIONS

• Maintain tight glucose control (target HbA1c < 7%)
• Monitor blood pressure regularly (target < 130/80 mmHg)
• Take prescribed diabetic medications regularly
• Reduce salt and sugar intake
• Exercise regularly (150 minutes per week)

10. FOLLOW-UP PLAN & MONITORING

• Next appointment: 1 month
• Required imaging: Bi-weekly OCT and specialist evaluation
• Consult retinal specialist if vision changes occur
• Seek immediate care for sudden vision loss
